DETAILED ACTION

This is the first Office action on the merits of Application No. 10/717,320, filed 19 November 2003. Claims 1-4 are pending.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or 1. additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with applicant's attorney, Kathryn Marra, on 15 June 2004.

The application has been amended as follows:

Claim 1:

- Line 3, replace the word "assembly" with --member--.
- Lines 4, 6, and 8, replace the word "relationship" with --path--.
- Line 9, replace the word "relationships" with --paths--.
- Line 10, replace the word "assemblies" with --members--.

Art Unit: 3681

2. The following changes to the drawings have been approved by the examiner and agreed upon by the above applicant's attorney:

• Fig. 1A, reference number "16", which points to the second synchronizer collar has been changed to reference number --26-- as per page 4, line 20 of the present specification.

In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

Allowable Subject Matter

- 3. Claims 1-4 are allowed.
- 4. The following is an examiner's statement of reasons for allowance:

Claim 1:

The prior art of record fails to show or render obvious a synchronizer clutch apparatus comprising an input driver having a shift collar, and at least three output driven members; wherein each of the at least three output driven members includes a synchronizer selectively engageable with the shift collar, as recited in the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

- 5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
 - Haka (U. S. Patent No. 6,663,529) teaches a planetary manual power transmission comprising a three-way synchronizer clutch 32 as shown in Fig. 1.
 - Orr et al. (U. S. Patent No. 2,658,413) teaches a transmission as shown in Fig. 1.
 - P. Orr (U. S. Patent No. 2,560,886) teaches a transmission as shown in Fig. 1.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David D. Le whose telephone number is 703-305-3690. The examiner can normally be reached on Mon-Fri (0700-1530).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles A Marmor can be reached on 703-308-0830. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
